

# Batteries recycling

## Yes

Dry cell

Alkaline & Carbon

Zinc

Lithium

Lithium - Ion

Mercury

Nickel cadmium

Silver oxide

Zinc air

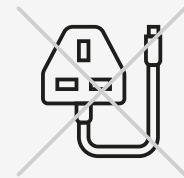

UPS batteries

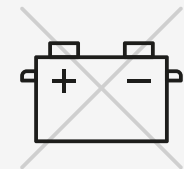

Server batteries

## No

Chargers

Car batteries

**FACT**

### Over 20,000 tonnes

of batteries are sent to landfill each year where they corrode, leaching chemicals into the soil which make their way into our water supply.

### Our solution

Mercury and zinc are extracted and recovered from used batteries and turned into new products such as batteries and lighting.
